

Regarding the future of Micromouse Contest and All Japan Contest

In order to be Micromouse Contest more attractive, we will adjust and change the names of each Contest and set up participation qualification to the All Japan Contest.

1. Changing the name of Contests

From the year 2018, we will change the name of Contests and operate the next 3 game events in All Japan Contest.

Also we will abolish prior classification (expert class, freshman class).

Micromouse Contest *ex: Micromouse (Half size) Contest

Classicmouse Contest *ex: Micromouse Classic Contest

Robotrace Contest

2. Operation of All Japan Contest

We will operate each Contest in All Japan Contest as follows.

Introduction of participation qualification system

Completion record holders of each regional Contest of the year will be able to participate in All Japan Contest. However, when participation to regional Contest is difficult (such as participants from foreign countries), we examine participation qualification separately and announce in Web and so on.

Abolition of preliminaries

Due to introduction of participation qualification, we will abolish preliminaries that we have done until previous year, and operate only finals.

Because of introduction of participation qualification and abolition of preliminaries, we will shorten 1 day in the schedule of All Japan Contest and operate 2 days for the time being.

We would like participants to understand and wrestle with constant passion to the new frame Micromouse.
